Financial Services

- PHP
- React
- JavaScript
- jQuery
- Node.js
- Wordpress

- Played a key role in the successful migration of a Wordpress website, resulting in significant improvements to its functionality.
- Developed and maintained new features on the company's website using PHP, Javascript (Pure, React), and Wordpress, contributing to its ongoing success.
- Worked collaboratively with team members to ensure timely delivery of projects and achieve high levels of efficiency.

Education

Royal Holloway, University of London Sep 2018 – May 2022 (3y 8m)

(2.2) Bachelor's degree, Computer Science

A Levels

- Maths
- Chemistry
- Physics

Snippets

Restaurant Website (WordPress) - 2021 @ maldonspice.co.uk

Creating a modern website for a new restaurant so customers are able to see details about the restaurant as well as book tables and order food

Restaurant Management System (React + NodeJS + MySQL) - 2020 @ github.com

Creating a restaurant ordering system with an intuitive UI, so customers can take orders and the staff can view them. Customers also pay using the system.

Discord Bot (Javascript) - 2019

Built a discord bot in JavaScript. Can perform functions such as playing music, responding to people in chat and post images

Personal Website (NodeJS + Express) - 2019

Built a small website so I can teach myself Javascript

Final Year Project, Genetic Algorithms (C#, Unity) – 2022

For my final year dissertation, i created a Unity project (written in C#) to utilise Genetic Algorithms. The project was to have the Genetic Algorithm figure out the ideal design of a car to complete a course in the fastest time.

Product Tracking Website (React, NodeJS, Postgresql) – 2023

Started on a project that would allow a user to track a product's price and notify them when it drops below a certain price. This utilises react, node on the front end and a Postgresql server running on Googles cloud service to handle the backend.

Naughts and Crosses Game (React) – 2023 @ noughtsandcrosses.herokuapp.com

Simple website where you can play the classic game naughts and crosses

Portfolio Website (React) – 2023 @ abdulhadi.dev

A portfolio website to show off my portfolios as well as my frontend development skills.

Wordle Clone (React) – 2023 @ home-5013336117.app-ionos.space

This project is based off Wordle (<https://www.nytimes.com/games/wordle/index.html>), it featured use of useEffect, useContext and useState extensively.

Pokemon Clone (Javascript) – 2023

This is still a work in progress project, its a basic version of Pokemon written in Javascript.

Arkanoid Game (Typescript) – 2023

A classic Arkanoid game with types, classes, modules and modern code in Typescript. Still work in progress :)

To Do List App (Angular) – 2023

This is a basic todo list that has features like: add, remove and complete a task.

More about me

I like to work with people who...

are open to change their or my way of thinking. I think we will work better if we can be more open with what we can collectively do better.

In my current role I'm missing...

I would like to work on projects that allow me to utilize my full potential and stretch my abilities.

Interests

Video games, Books, Football, Formula 1, AI (especially AI art generation, it looks cool)

I'm excited to work for a fast-growing company because...

in one word, exciting! In more words, i think its cool to work for a smaller/fast growing company because I feel more personally involved with work and changes in the company.

In my next role I'd like to learn...

everything! or at least anything that my next role can teach me, i would like to absorb it ALL if possible :)
